

Emmanuel M. Bitang

Calaca City, Batangas / +63926-170-9017 / emmanuelbitang@gmail.com

Full Stack Developer –

Ascendion (Metropolitan Bank and Trust Company). Taguig, Metro Manila South.

React / React-Boilerplate / Redux-Saga / Loopback / MongoDB / Oracle / Node.js / Typescript / Git / GitLab / Material-UI
Collaborates with Business Analyst to provide design inputs and estimates in the preparation of requirements document. Documents system design and program specification in technical design document. Writes programs and codes based on approved technical design document. Develop prototypes as needed. Perform other related functions that may be assigned from time to time. Comply with agile development lifecycle standards of the company.

Developer – Crised-studio.com. Taguig, Metro Manila South.

React / Styled-components / JavaScript / Material-UI / CSS / JSX / Node.js

Implemented, maintained, and designed a mobile friendly website for a photography business with a 1k+ followers. Through this site the business was able to attract 50% more followers and clients, reaching a wider audience for online promotion of services and offers, and establishing or enhancing brand recognition.

Developer – Cryptocointracker. Taguig, Metro Manila South.

React / JavaScript / CSS / Axios / JSX / Node.js

Created a cryptocurrency tracker web app to monitor the market value of each coin in real-time fetching data using API from api.coingecko.com. By making this tracker, I have a clear overview of my coin investments of live price in both Bitcoin and USD. Keeping an eye on the overall Rolling Profit/Loss summary on all my positions together.

Developer – Travel-around. Taguig, Metro Manila South.

React / HTML / CSS / JSX / Node.js

Created and designed a resource that shows the structure for the comprehensive layout and display features of a travel website for web template and marketing. It also helped make my designing a lot easier.
