

Emmanuel M. Bitang

Calaca City, Batangas / +63926-170-9017 / emmanuelbitang@outlook.com

Full Stack Developer –

Ascendion (Metrobank). Bonifacio Global City, Metro Manila.

React / React-Boilerplate / Redux-Saga / Loopback / MongoDB / Oracle / Node.js / Typescript / Git / GitLab / Material-UI

Collaborates with Business Analyst to provide design inputs and estimates in the preparation of requirements document. Documents system design and program specification in technical design document. Writes programs and codes based on approved technical design document. Develop prototypes as needed. Perform other related functions that may be assigned from time to time. Comply with agile development lifecycle standards of the company.

Developer – Crised-studio.com. Taguig, Metro Manila South.

React / Styled-components / JavaScript / Material-UI / CSS / JSX / Node.js

Implemented, maintained, and designed a mobile friendly website for a photography business with a 1k+ followers. Through this site the business was able to attract 50% more followers and clients, reaching a wider audience for online promotion of services and offers, and establishing or enhancing brand recognition.

Developer – ReAct-Agent.

LangChain / LangGraph / Python 3.11+ / OpenAI API

A conversational AI agent built with LangChain and LangGraph, powered by OpenAI's GPT models. This system is designed to intelligently interpret user requests, manage multi-turn conversations, and coordinate tool interactions with precision. By combining natural language understanding with structured workflow management, the agent can dynamically invoke APIs, handle complex tasks, and adapt to context across conversations.

Developer – Resume-Critiquer.

Streamlit / OpenAI API / Python 3.14+

A professional platform that leverages artificial intelligence to evaluate and enhance resumes with precision. It provides constructive feedback on structure, clarity, and keyword optimization, ensuring alignment with industry standards and applicant tracking systems (ATS).

Developer – Travel-around. Taguig, Metro Manila South.

React / HTML / CSS / JSX / Node.js

Created and designed a resource that shows the structure for the comprehensive layout and display features of a travel website for web template and marketing. It also helped make my designing a lot easier.
